Subject: Hyperion Air Permit

Gentlemen:

in accordance with the Hyperion PSD application guidance directions, it states that there will be a public comment hearing, the date and time of the hearing will be determined by the board of minerals and environment. it says that the public hearing **MAY** occur near the proposed refinery site. i would strongly suggest that you in fact hold the public hearing near the proposed refinery site since there are many many concerned citizens that will be affected by the decisions of this board and it is imperative that they be involved in your decision. as you can see by the responses to the public comment there are thousands of people that are concerned about this proposed refinery and we would welcome the opportunity to be able to respond but it would be an undue hardship for that many people to have to travel to Pierre to be heard.

your consideration on having the public hearing at the proposed refinery site area would be greatly appreciated.

sincerely yours

doug maustad
